PROFESSOR JAYASHANKAR TELANGANA AGRICULTURAL UNIVERSITY
(Formerly Professor Jayashankar Telangana State Agricultural University)
Administrative Office, Rajendranagar, Hyderabad-50030, Telangana, India.

Dr. P. RAGHU RAMI REDDY
M.Sc. (Ag), Ph.D
DIRECTOR OF RESEARCH

Date: 25.01.2025

CERTIFICATE OF PROJECT COMPLETION

This is to formally place on record the successful completion of the Collaborative Technical Project titled **"Development of Mobile App Application (Digital Platform) for Precise Detection and Diagnosis of Insect Pests and Diseases"** undertaken jointly by Professor Jayashankar Telangana Agricultural University (PJTAU) and K L University, Hyderabad, during the period from 25th August, 2024 to 25th January, 2025. The project was executed in accordance with the approved objectives and technical framework, reflecting a high standard of academic rigor and professional competence. On behalf of PJTAU, I hereby convey sincere appreciation and commendation to the following project members for their dedicated efforts, technical expertise and significant contributions, which were instrumental in the successful development and completion of the digital platform.

S. No.	Name	Specialization
1	Tadivaka Sathwik	Full Stack Development
2	Pinninty Harishith Chowdary	Web & App Development
3	Naralasetty Varun	Web & App Development
4	Pathakota Dinakar Siva Srinivas	DevOps & Product Management
5	Kolli Krupa Johnson Chowdary	Database & App Development
6	Anugandula Sriram	Application Security
7	Gudapati Vedardha Naga Sai Manikantha	DevOps & Product Management

During the project tenure from August 25, 2024 to January 25, 2025, the team demonstrated advanced technical competence in the design and implementation of an integrated digital diagnostic framework for real time detection and diagnosis of insect pests and crop diseases. The project involved end to end system architecture development of a synchronized mobile application and centralized, database driven web dashboard enabling geo referenced image capture, automated data synchronization, expert validation, structured case allocation, and secure bidirectional transmission of evidence based treatment advisories, thereby establishing a closed loop decision support system. The prototype constitutes a scientifically robust and technologically scalable platform for precise and effective pest and disease surveillance and management, and is expected to significantly enhance diagnostic accuracy and decision support efficiency in the near future. The undersigned formally acknowledges and appreciates their technical contributions toward advancing precision and digital agriculture initiatives and conveys its best wishes for their future academic and professional achievements.

With Regards

P. 25/1/25
